

## **Direction gyroscope with integral-position horizontal correction in rolling**

*Meleshko V.V., Skudneva O.V., Janchevski A.J.*

The work of device in a mode position, integral - position and integral horizontal correction in rolling are research. It is shown, that use of integral Shuler horizontal correction provide definition of a true course without drift. This correction gives information about aircraft velocity.

**Keywords:** *directional gyro, integral-position horizontal correction, pitching, gyroscope drift*
